

DISCLOSURE AND CONSENT - MEDICAL AND SURGICAL PROCEDURES

surgical, medical or diagnostic procedure to be used so that you may make the decision whether or not to
undergo the procedure after knowing the risks and hazards involved. This disclosure is not meant to scare or
alarm you; it is simply an effort to make you better informed so you may give or withhold your consent to the
procedure.
1. I (we) voluntarily request Doctor(s) as my physician(s),
and such associates, technical assistants and other health care providers as they may deem necessary, to treat
my condition which has been explained to me (us) as (lay terms): Gallbladder polyp-abnormal growth inside
gallbladder
2. I (we) understand that the following surgical, medical, and/or diagnostic <b>procedures</b> are planned for me and I (we) voluntarily consent and authorize these <b>procedures</b> ( <b>lay terms</b> ): <u>Laparoscopic Cholecystectomy-surgical removal of the gallbladder using a camera and instruments through small incisions in the abdomen while visualizing procedure on monitor; x-ray of tubes from gallbladder to liver and bowel using radiopaque dye. Possible open gallbladder – surgical removal of the gallbladder through larger incision in abdomen</u>
Please check appropriate box: □ Right □ Left □ Bilateral □ Not Applicable
3. I (we) understand that my physician may discover other different conditions which require additional or different procedures than those planned. I (we) authorize my physician, and such associates, technical assistants, and other health care providers to perform such other procedures which are advisable in their professional judgment.
4. Please initialYesNo
I consent to the use of blood and blood products as deemed necessary. I (we) understand that the following risks and hazards may occur in connection with the use of blood and blood products:  a. Serious infection including but not limited to Hepatitis and HIV which can lead to organ
damage and permanent impairment.
b. Transfusion related injury resulting in impairment of lungs, heart, liver, kidneys and immune
system.
c. Severe allergic reaction, potentially fatal.
5. I (we) understand that no warranty or guarantee has been made to me as to the result or cure.
5. Just as there may be risks and hazards in continuing my present condition without treatment, there are also risks and hazards related to the performance of the surgical, medical, and/or diagnostic procedures planned for me. I (we) realize that common to surgical, medical and/or diagnostic procedures is the potential for infection, blood clots in veins and lungs, hemorrhage, allergic reactions, and even death. I (we) also realize
that the following hazards may occur in connection with this particular procedure: Pain, Severe bleeding,
Infection, Pancreatitis, Injury to the tube between the liver and the bowel, Retained stones in the tube between
the liver and the bowel, Narrowing or obstruction of the tube between the liver and the bowel, Injury to the

TO THE PATIENT: You have the right as a patient to be informed about your condition and the recommended

7. I (we) understand that Do Not Resuscitate (DNR), Allow Natural Death (AND) and all resuscitative restrictions are suspended during the perioperative period and until the post anesthesia recovery period is complete. All resuscitative measures will be determined by the anesthesiologist until the patient is officially discharged from the post anesthesia stage of care.

bowel and/or intestinal obstruction, Trocar site complications (e.g. hematoma/bleeding, leakage of fluid, or

hernia formation, infection, pain), Conversion of the procedure to an open procedure

## **CONSENT FOR EXAMINATION OF PELVIC REGION**

For pelvic examinations under anesthesia for student training purposes.

A "pelvic examination" means a physical examination by a health care practitioner of a patient's external and internal reproductive organs, genitalia, or rectum.

During your procedure, your health care practitioner, or a resident designated by your health care practitioner, may perform or observe a pelvic examination on you while you are anesthetized or unconscious. This is a part of the procedure to which you have consented.

**With your further written consent,** your health care practitioner may perform, or allow a medical student or resident to perform or observe, a pelvic examination on you while you are anesthetized or unconscious, not as part of your procedure, but for <u>educational purposes</u>.

The pelvic examination is a critical tool to aid in the diagnosis of women's health conditions. It is an important skill necessary for students to master.

Your safety and dignity is of highest importance. All students and residents are under direct supervision during pelvic examinations.

You may	consent or refuse to consent to an e	ducational pelvic examin	nation. Please check the	e box to indicate your	preference:
