## **CONSENT FOR EXAMINATION OF PELVIC REGION**

For pelvic examinations under anesthesia for student training purposes.

A "pelvic examination" means a physical examination by a health care practitioner of a patient's external and internal reproductive organs, genitalia, or rectum.

During your procedure, your health care practitioner, or a resident designated by your health care practitioner, may perform or observe a pelvic examination on you while you are anesthetized or unconscious. This is a part of the procedure to which you have consented.

<u>With your further written consent</u>, your health care practitioner may perform, or allow a medical student or resident to perform or observe, a pelvic examination on you while you are anesthetized or unconscious, not as part of your procedure, but for <u>educational purposes</u>.

The pelvic examination is a critical tool to aid in the diagnosis of women's health conditions. It is an important skill necessary for students to master.

Your safety and dignity is of highest importance. All students and residents are under direct supervision during pelvic examinations.

You may consent or refuse to consent to an educ	<u>eational</u> pelvic examination. Ple	ease check the box to indicate your	preference:
☐ I consent ☐ I DO NOT consent to a medical structure purposes.	tudent or resident being presen	t to <b>perform</b> a pelvic examination	for training
